Astute
Speaker Range

Dramatically Outperforms Conventional Small Speaker Systems

Astute Speaker Range

Ellipse

An **Exquisite** stand exhibiting great **Stature** with a **Beautiful** loop.

Dynamic

An **Energetic** stand to environment.

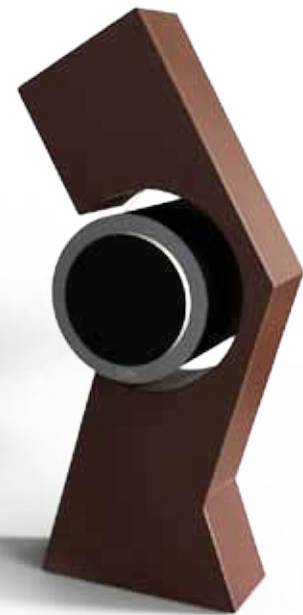

Precision

Engineered to create a **Technical** style.

Magnificent

A **Showpiece** stand bringing a touch of **Flair** to a **Grand** home.

Contemporary

A **Pure** design that is an **Unobtrusive** and **Fresh** addition to your environment.

Finishes (for E

Listening to good music through a great system is highly therapeutic. It helps you relax, unwind and become refreshed. The difference between HD, 3D Film and standard picture quality is appreciated by many people. A great sound system is likewise, vastly superior to a mediocre one. The Astute Loudspeaker range is utterly extraordinary - Unique in its ability to

deliver true high definition, 3D sound in your home.

Not only does it deliver ultimate sound quality, but it also enhances almost every taste in decor imaginable. The range of eye catching stand designs and cabinet finishes have been crafted to enhance the ambiance of your home.

to Invigorate the

Poise
An Agile and Radical design oozing Confidence.

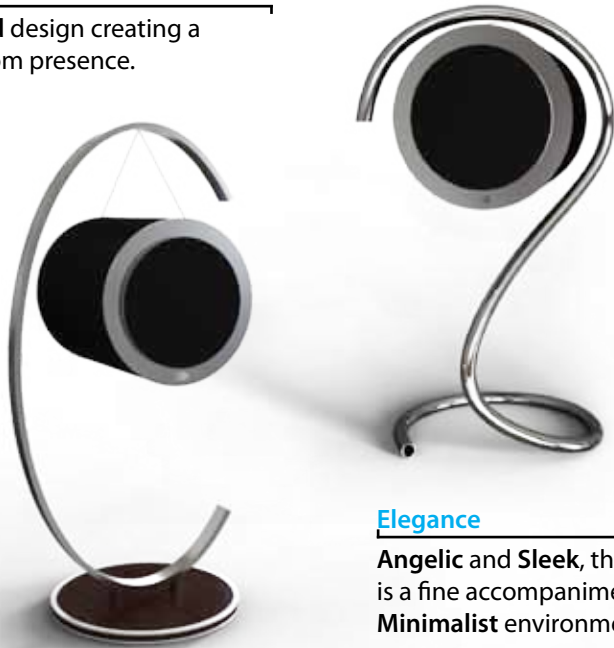

Balance
A touch of Mystery and Illusion.

Crescent
This Sweeping design is at home in most environments.

Panache
A Composed design creating a Superior room presence.

Elegance
Angelic and Sleek, this design is a fine accompaniment to the Minimalist environment.

(Baffles & Bases)

Origin Live has an excellent track record as a winner of numerous Hi-Fi awards, including being voted by the public as "Best sound at the show award" in Vienna. As a forerunner of many innovative designs, Origin Live have developed an enviable reputation. This includes winning a group comparison test against several of the leading speakers on the market.

At Origin Live, we are delighted to offer something very special to enhance your listening pleasure and add to the aesthetics of your home.

User Friendly

- **Flexibility:** In self powered form, the Astute Loudspeakers connect directly to mobile devices such as iPods, iPads, laptops etc (anything with a jack plug output). You can also control these via wireless. TVs , CD players etc are also easy to connect.
- **Versatile:** In passive form, you just connect the speaker to your amplifier or sound system outputs. This is ideal for purists who want a non digital design. For those who want the advantages of ultimate control then Digital Signal Processing (DSP) is available as an option.
- **A flexible upgrade path** is available with easy to install “add ons.”

Why a ‘Hanging’ design?

- The hanging design is incredibly effective in isolating the Astute’s moving parts from being continuously shaken by delayed energy reflections from the floor.
- **Only** larger speakers with the mass of the Astute can take full advantage of this type of design.
- There is a much improved uniform radiation pattern of the sound due to free space all round the speaker cabinet.

Performance Superiority

The trend at present is towards ever smaller speakers with sub-woofer systems. The major side effect of this is that sound quality decreases drastically. There is simply no comparison between a good large speaker and the “unobtrusive” small satellite / subwoofer combinations on offer.

- **Highly efficient** due to horn loaded tweeter and large woofer size. The Astute speakers have much better dynamic response than smaller speakers and are also easier to power cleanly. Experts have always said of speakers “a good big one will always beat a good little one” - this is drawn from the laws of physics and cannot be overridden no matter how well a small box is designed.
- **Specially selected high grade components:** Many speakers look great, but the quality of components can be completely inadequate for high performance - it’s a bit like taking a Ferrari body shell and fitting it with the engine, chassis and suspension of the cheapest car on the market.
- **Superb bass performance** due to spacing away from the floor and other key design aspects - Subwoofers tend to be “one note boom boxes” fairly incapable of producing the right textures, power and harmonics of bass frequencies.

- **Three dimensional sound image** - The ability of a speaker to produce a believable 3D sound image is not easy but the Astute delivers an amazing “out of the box” sound. It should be added that “in wall” or rear wall placement will never produce this type of performance for a variety of reasons.
- **Reduced internal standing waves:** The radial cabinet shape reduces the resonance problems common to box shaped speakers.
- **Compatibility for all types of room:** Most rooms will alter the perceived sound of your speakers from what it should be. To overcome this problem the sound can be “corrected” with optional Digital Signal Processing (DSP) .
- **No hot spots** with top models in the Astute range – A major shortcoming of conventional sound systems is that, you need to be positioned centrally to the speakers to hear a proper 3D sound image. Origin Live’s ground breaking design revolutionises the ability to hear the system almost equally well wherever you are in the room.
- **Electronics are housed outside the speaker cabinet** thus isolating them from vibration and the effects of driver magnetic flux changes. This preserves the delicate nuances of the signal from being destroyed.

Style

- **Wide variety of stand designs** vary from visually stunning show-pieces that contribute aesthetic beauty, to unobtrusive, low profile frames. Bespoke designs are also available to order.
- **The extensive range of finishing materials and colours** are selected to blend perfectly with the décor of your home. This includes wood veneers, leathers, metals, coloured anodising, and bespoke textile designs.
- **Can be suspended from your ceiling** at any height and angled downwards if desired. This saves space and is cost effective as no stand is needed.

Size

- **Average stand dimensions (Height x Width x Depth):** 1.2m x 0.5m x 0.5m
