

Origin Live

Origin Live is a fiercely independent British maker of turntables, arms, turntable accessories and cables. It also makes a series of upgrades to a range of existing turntables and tonearms, and supplies a select range of cartridges, phono stages and third-party accessories to bring out the best in a turntable.

In other words, Origin Live has amassed a significant amount of knowledge about all things turntable over the years and that covers every aspect of the LP replay chain. What better place to start looking to find your next turntable or arm?

Perhaps most significantly, Origin Live is one those 'giant killer' brands

that produces a range of products that perform far better than than similarly-priced rivals. That only comes through the careful application of good engineering, and years and years of experience and enthusiasm.
