

TONEARM ORIGIN LIVE SILVER MK4

This British vinyl specialist has been making great pickup arms for the best part of thirty years now. It started by re-engineering Regas but soon began doing its own designs and hasn't looked back. Origin Live arms aren't perhaps the most visually alluring, but the sonic performance speaks for itself. This latest Silver Mk4 offers a great sound for the money, with a very clean, open, three-dimensional soundstage, plus great musical timing and fine dynamics. It's hard not to like for the money.
