

ORIGIN LIVE STROBE DISC

Instructions

Cut out the disc and place it on a record to be played. Play the record and watch the relevant ring on the disc. Adjust the speed until marks on the ring appear stationary while the record is rotating. It sometimes helps to stare at infinity whilst doing this as the marks become easier to see. Use under a fluorescent light. These flicker at 50 Hz in the EEC and 60 Hz in the USA.

You can purchase bayonet fitting fluorescent bulbs to fit normal lamps. Try to shut out daylight when carrying out speed setting. It helps to keep the fluorescent light at least 2 meters away.

Inner circle is 50 Hz 45 rpm
2nd circle is 60 Hz 45 rpm
3rd circle is 50 Hz 33 rpm
Outer circle is 60 Hz 33 rpm
